

Health Review Bot

Due to the stigma associated with mental health, many individuals go undiagnosed and therefore don't have access to the resources to improve their mental wellbeing. Further, it's difficult to track patient wellbeing over time.

We turned this problem into an opportunity

The team developed Health Review Bot (HeRB) to foster early intervention for mental health illnesses through pre-consultation screenings in the GP waiting room.

HeRB is a chatbot based on the Depression Anxiety Stress Scale (DASS) that provides GPs with an up-to-date measure of a patient's mental health status.

Medicine

Impacts and Outcomes

Social

Shifts focus from disjointed treatment to wholesome patient outlook

Fosters trust between patients and GP's

Financial

SuPrime research study - \$360 to initially fund the program for 1500 patients over 3 years

Predicted \$4,800 p/a for GP's and additional income for aged care, research and back to work services.

Human

8 at risk patients identified

Empowers patients to care about their wellbeing

Facilitates education and understanding of mental health

Looking Forward

HeRB is currently in negotiations for \$100k in funding, a research study with eHealth Queensland and discussions to gain national accreditation with GP governing bodies. In addition, we have a three year contract with the SuPrime study to provide maintenance and staff training at \$40 per month.

2018 Annual Report

Only 78% of indigenous Australians meet the national minimum Year 3 literacy standards, compared to 95% of non-indigenous Australians. Moreover, only 60% of Australians are proud and aware of indigenous art and culture.

We turned this problem into an opportunity

Best Foot Forward (BFF) engages local Indigenous artists to design socks and wearable accessories with stories from the Dreamtime, thereby creating an avenue to create conversation around Indigenous art and culture.

Proceeds from sales support those artists whilst also assisting Best Foot Forward's partners to lower the literacy gap in indigenous communities.

Impacts and Outcomes

Physical

Additional sales channels for Indigenous artists

Financial

\$4,335 in sales over past financial year

\$1,300 allocated to ILF

\$867 allocated to KIC

Natural

Environmentally certified cotton materials

Social

Empowerment of Indigenous artists

Australian designed and manufactured

Active discussion of Indigenous culture

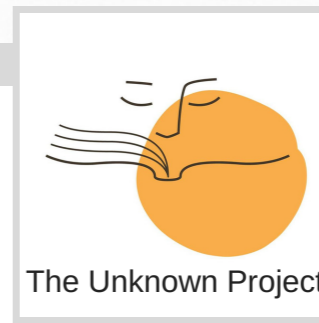

Human

Literacy development for Indigenous children

Looking Forward

Best Foot Forward's objective is to raise \$15,000 by the end of Financial Year 2018. By July 2019, Best Foot Forward will have developed its partnerships to have a stronger involvement in literacy development that exceeds the provision (generation) of proceeds.

Families from asylum seeker and refugee backgrounds lack access to school resources and opportunities, exacerbated by the divisive debate on the global refugee issue.

We turned this problem into an opportunity

The Unknown Project challenges these perceptions through a 'blind date with a book.'

The Unknown Project has expanded to funding resources and employability skills workshops for refugees to further bridge this gap give them the chance at a 'fair go.'

Partners

Impacts and Outcomes

Social

Addressed stigma and stereotypes surrounding refugees

Fostering an inclusive community where everyone can participate

Financial

Generated \$2,050 in revenue

\$3,000 generated through development workshops

Over 1000 books donated and 500 sold

Human

Empowers refugees to achieve potential in Australia

Facilitated access to educational resources and technology

Physical

Delivered 6 workshops for 16 people

Donated 20 Microsoft Surface Tablets

Provided over 30 school resource packs

Looking Forward

The Unknown Project's next step is to build a reliable volunteer base to upscale our impact. In 2018, we will expand our programs with support from local Brisbane high schools.
